

Prior Authorization Portal: Story & Workflow Simulator

This document compiles the implementation details, visual structures, educational takeaways, and engineering reflections of the Prior Authorization Training Portal—a unified, self-contained educational tool modeling the clinical, patient, and payer lifecycles of U.S. healthcare utilization management.

1. Interactive Simulator Showcase

Module 1: Patient Story Journey (Narrative Mode)

Visual Mechanics: An append-only conversational interface styled with distinct blue (Patient) and indigo (Specialist) dialogue bubbles.

Side-Panel Context: Tracks patient demographics, diagnostic markers (Rheumatoid Arthritis, ICD-10 M06.9), and is augmented by the Live Plan Status panel. This panel dynamically moves from "Not Initiated" through "Denied" to "Approved" with a unique authorization reference (AUTH-88219A) and checklist validation markers ().

Prior Authorization Training Portal

Master patient advocacy, administrative criteria, and clinical guidelines.

Module 2: Interactive Workflow Board (Analytical Mode)

Visual Mechanics: A 3-lane clinical workspace (Patient, Provider, and Payer domains) with interactive drop zones.

Interactive Challenges: Features a live guideline criteria linker, a multi-file document attachment packet, and active administrative trackers tracking simulated Days Elapsed and your Process Efficiency Score.

DIAGNOSIS

Lower back pain with radiculopathy (ICD-10 M54.16)

PRESCRIBED SERVICE

MRI Lumbar Spine without contrast

HISTORY LOGS

Patient has lower back pain radiating to left calf. Symptoms have persisted for 2 weeks. No red flags (no fever, no bowel/bladder dysfunction, no history of cancer). Progressive foot drop is noted on examination.

2. Complete Self-Contained Source Code

The complete, integrated single-file HTML application is provided below. This build features the dynamic Live Plan Status sidebar and uses safe child-node checks (`feed.children.length === 0`) to prevent comment or whitespace node initialization blocks.

Deconstruct the PA Journey

Prior Authorization (PA) is a critical administrative process. Click the button below to examine the process.

Module 1: Patient Story Journey

Follow Rahul, a patient diagnosed with Rheumatoid Arthritis, and Priya, an access specialist, through an 8-scene interactive dialogue. Learn how step-therapy criteria and operational delays impact patients.

- ◆ Beginner-friendly explanations
- ◆ Branching scenario-based dialogue
- ◆ Focus on clinical advocacy & patient impact
